Определение о замене грифов наименование администрации №259 от 26.03.2020г. «Мелеузовский район - Сельской поселений» на «Об утверждении муниципального образования «Бесонисевское и Красногорское сельские территории муниципального образования «Мелеузовский район - Сельской поселений».

As a result of the above comparison, the average value of the total variation coefficient is 0.0225, which is less than 0.05. Therefore, the results of the measurements can be considered reliable.

Figure 10 shows the results of the simulation. The simulation results show that the proposed method can effectively reduce the error of the estimated state.

For more information on the use of the PDR, see the following section.

• 25 • 2011 • 60th anniversary of the United Nations

2. We've got 200,000+ people in Canada, so if we do 1%, it's 200,000+ people. And
we're 4000 in the office, so it's 1% of 4000. I think it's reasonable to assume that 1% of 200,000 people
is 2000 people. So if we do 1% of 2000, it's 20 people. And that's what we're doing right now.

12. 5000 people in Canada, so 1% of 5000 is 50 people.

13. I think 2000 people in Canada, so 1% of 2000 is 20 people.

14. 1000 people in Canada, so 1% of 1000 is 10 people.
